SIS Fictional Workflow Guide -- QA Test Fixture

SOURCE: SIS_Upload_QA_Fixtures (synthetic test document, not an official SIS publication)

This is a fictional, synthetic procedural document created only to test the
SIS chatbot's document-upload and question-answering pipeline. Nothing in
this document should be treated as a real department rule.

PREREQUISITES (fictional, for testing only):
1. A completed test application form (Form QA-1, fictional).
2. A synthetic survey sketch reference number.
3. Confirmation that the fictional applicant has no other open test file on
   the same synthetic survey number.

Fictional Validation Steps

STEP 1 (fictional): The test officer checks the synthetic application reference against the fictional register.

STEP 2 (fictional): The test officer verifies the synthetic sub-division sketch was attached. If it is missing, the fictional file is marked 'awaiting sketch' rather than rejected outright.

STEP 3 (fictional): The test officer forwards the fictional file to the Senior Test Draughtsman for synthetic review.

EXCEPTIONS (fictional): A fictional file flagged 'urgent-test' skips Step 2 and goes directly to Step 3.

Fictional Terminology

QA-WF = fictional workflow code used only in this test document.
This document deliberately does NOT define or mention OCR anywhere, so a later question asking the chatbot to "explain OCR" must not be answered as if OCR were part of this document's content.
