

Synthetic SIS Field Visit Memo

Page 1 - Test-only case: TEST-2026-ISD-001.

Visit date: 18 October 2026, 10:30 AM. Ward: 102. Survey: 77/3B. Applicant: Kavitha Raman (fictional).

Purpose: verify a proposed ISD boundary before sketch review. The eastern boundary is described as a public pathway. The northern boundary is noted as Survey 77/4.

Observation: corner stones were said to be visible at three points. This is an invented observation for chatbot attachment testing, not a field finding.

Synthetic SIS Field Visit Memo

Page 2 - Checklist and follow-up.

Carry the field book, measuring tape, owner notice acknowledgement, and the prior sketch. Check that the sketch has a north arrow, scale, boundary measurements, adjoining survey references, surveyor signature, and date.

Follow-up: the field measurement sketch is missing from the fictional application pack.

Do not approve or reject any real case on the basis of this memo.
